Re: Freedom of Information Act Request EPA-R9-2014-003881

Dear Mr. Godinez:

This is in response to your Freedom of Information Act request regarding:

Available public records for properties located at 100 Puente Del Monte Ave, Gonzales, CA and 34520 Morisoli Rd, Soledad, CA.

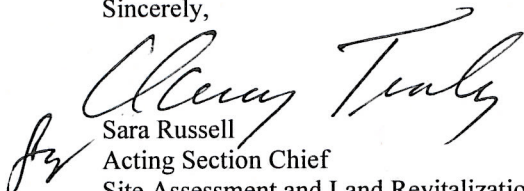

Information regarding the property at 100 Puente Del Monte Ave, Gonzales, CA is enclosed. Please note that the Risk Management Plan does not include the Offsite Consequence Analysis (OCA). Offsite Consequence Analysis (OCA) involves the use of atmospheric dispersion modeling to determine the potential impact of an accidental release (to public receptors) from a RMP regulated chemical process. This includes modeling of chemical releases, vapor cloud fires and explosions. The OCA includes worst case scenarios and alternate case (more likely or realistic) scenarios for toxics and flammables.

The federal government determined that restricting public access to OCA information would decrease the risk of terrorist attacks and criminal activity. The public can review OCA information by visiting Federal Reading Rooms, which are available by appointment only. Additional information on Federal Reading Rooms, including locations and contact information, can be found at: <http://www.epa.gov/oem/content/rmp/readingroom.htm>.

No records were found for the address at 34520 Morisoli Rd., Soledad, CA 93960.

If you have any questions, please contact Sharon Murray of this office at 415-947-4250.

Sincerely,

Sara Russell
Acting Section Chief
Site Assessment and Land Revitalization Section
